

# Team Contract for **Team2**

---

- We agree that we will participate actively in this class project.
- We agree that all members of our team will be present during the demo for each milestone.
- We agree to consistently meet as a team at **7pm. Wednesday** (time(s) and day(s)) [expected meeting time: 1 hour] each week for the duration of the course project. This is in addition to meeting separately in pairs (if our meetings last long enough that we do all our work and pairing during the meetings, then we don't need separate meetings for pair programming), and this is separate from team meetings with your course staff supervisor.
- We agree that we will do actual pair-programming and that we will switch pairs regularly.
- We agree that we will respond to e-mail/calls/etc. from our team members and the course staff within **24** hours.
- We agree to report an unresponsive team member to the course staff as soon as problems occur.
- We agree that we will seek help from the course staff and not wait until the last minute before the assignment is due.
- We agree that we will post our progress frequently on our team's page on the GitLab repository.
- We agree to reach out a second time if someone did not respond to a message.
- We agree to not misuse our owner rights in the gitlab project and group.
- We agree to faithfully review the code written by others.
- We agree to follow the code style well.
- We agree to not violate honor code by secretly copying other people's GitHub code or resource without specifying the reference.
